- AVAILABLE IN DIFFERENT SIZES AND ASPECT RATIOS
- TWO-YEAR PARTS AND LABOR MANUFACTURER WARRANTY

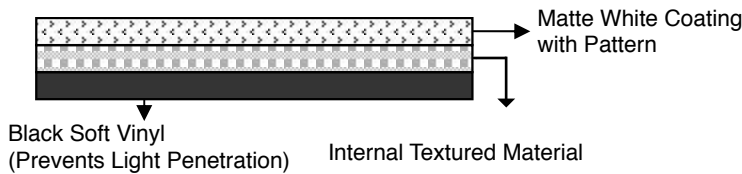

The Elite ezCinema Series is a highly portable projection screen for the traveling presentation or mobile home theater viewing. The Simple Telescoping Mechanism Hardware (STMH) design provides an easy solution for a quick set up/break down projection surface with adjustable height settings. Fabric carrying case is included.

MaxWhite Screen Material

The most versatile and uniform screen surface for front projection. This material provides broad viewing angles and perfect uniformity while giving precise definition in color reproduction and black/white contrast. Screen Surface is durable for daily use and washable with mild soap and water. It is also mildew resistant.

PVC Screen Material is a multi-layer, cross-array layout, surfaced with a textured matte white optical coating and black backed to prevent light penetration for optimal picture quality.

The EZ-Cinema comes up out of the case and is supported by an adjustable telescoping bar. Its extra-long extruded aluminum case with rotating floor supports provides product stability during operation and is designed for regular usage.
