Maxell expands their laser projector line with a 5,000 ANSI lumens, 3LCD model delivering larger-than-life performance.

Maxell's laser light source projector line now includes the 3LCD model MP-EU5002 with 5,000 ANSI lumens. The new laser phosphor light source offers approximately 20,000 hours (normal mode) of operation time and is virtually maintenance free, there is no lamp to replace providing a dramatic reduction in total cost of ownership. Ideal for digital signage applications, as well as a perfect choice for auditoriums, lecture halls, large classrooms, conference rooms and museums. Plus, 5,000 ANSI lumens brightness and 500,000 : 1 contrast ratio results in super bright display with outstanding image clarity and uniformity. Additionally a suite of advanced features includes High Dynamic Contrast Range (HDCR2), 3 HDMI ports, and Maxell’s original technology Accentualizer. As with all Maxell projectors, you can expect vibrant image quality, cost-efficient operation, and long-lasting reliability. For added piece of mind, Maxell’s MP-EU5002 is also backed by a generous 5-year warranty and our world-class service and support programs.
Long Life 20,000 Hours Laser Light Source
Light source combines blue laser diodes and phosphor which can achieve over 5,000 lumens. The projection image is bright and clear, with vivid colors. Since lamp replacement is unnecessary, maintenance cost is reduced and by not using mercury lamps, the projectors are eco-friendly.

Plus, Maxell’s unique cooling system can achieve a low noise level of 34 dB. The life of the light source is approximately 20,000 hours at normal mode but by using other modes which reduce the brightness or operation period, its life can be extended up to 50,000 hours. These mode settings can be used for different purposes depending on the application of the projector.

UNIQUE FEATURES

Accentualizer
Maxell original technology makes pictures look more real by enhancing sharpness, gloss and shade to make pictures as clear as pictures on a flat-panel device. You can also adjust the effects by three levels according to your surroundings so that the colors of projected images are the actual colors of the objects they represent.

Aspect Zoom
Aspect Zoom makes the maximum image size on the screen while keeping the aspect of the image.

HDCR2 (High Dynamic Contrast Range)
When average projectors are used in bright rooms, the darker colors of an image deteriorate and images become unclear. Using this function, blurred images caused by room lighting or outside light sources are corrected, and an effect similar to increasing contrast occurs. The recent enhancement to HDCR2 achieves not only auto tone enhancement but also auto color enhancement. This results in clear and vivid images even in bright rooms.

Cloning Function
Copy setting data from one projector to others of the same model via USB memory. Cloning not only saves almost all PJ settings such as gamma and keystone via USB memory, it saves countless hours in setup and installation.

MHL™
MHL (Mobile High-Definition) allows users to mirror their phone/tablet screen with the projector display. It is compatible with any and all apps.

Perfect Fit 2
Enables the user to adjust individual corners and sides independent of one another. Perfect Fit 2 provides vertical and horizontal digital correction of either barrel or pin cushion distortions. This feature helps correct geometric and complicated distortions. Perfect Fit 2 allows the projected image to fit correctly to the screen quickly and easily.

Projector Quick Connection App For Mobile Devices
Our iOS and Android applications offers projector control and also provides the capability to display photos, document files and web site contents. Available for iPad®, iPhone® and Android devices. Works over your LAN via your RJ-45 port or via an optional USB/WL5G wireless adapter.

STANDARD FEATURES

Input Source Naming
Users can name input sources in simple language instead of factory default names.

Network Control, Maintenance and Security
Embedded networking gives you the ability to manage and control multiple projectors over your LAN. Features include scheduling of events, centralized reporting, image transfer and e-mail alerts for reactive and routine maintenance.

PC-Less Presentation
By using a USB memory stick or other storage device, you can use the projector without a computer. Menus are easy to see with a thumbnail display. Additionally there is also a slideshow and video function.

PIN Lock / MyScreen / MyText
PIN lock protection can limit projector users. MyScreen PIN lock keeps captured images on the startup screen. Users can set any name logo to MyScreen, clearly identifying ownership. MyText provides the ability to write text on the startup screen such as model name, serial number or location.

DICOM® Simulation Mode
Images in DICOM (Digital Imaging and Communications in Medicine) Mode are reproduced with an advanced grayscale level. This mode is ideal for viewing grayscale medical images such as X-rays, and for training and educational purposes. These projectors are not approved medical devices. They should not be used for actual medical diagnosis.

Wireless Presentation Compatible
Connect the projector to a a computer or your network using the optional USB wireless adapter (part number USBWL5G). The adapter supports IEEE802.11 a/b/g/n/ac.

360° Rotation/Portrait Projection
Display rotation of 360° and portrait projection for creative applications and greater installation flexibility.
Enhance the experience with Maxell’s MP-EU5002.

The MP-EU5002 LCD Laser projector from Maxell is specifically designed to enhance the visual experience — from the audience to presenters. Vivid colors. Bold graphics. Crisp text. The MP-EU5002 does it all in environments of all sizes. With 5,000 ANSI lumens of brightness and WUXGA 1920 x 1200 resolution, the MP-EU5002 provides the perfect compatible solution.

It also features a high contrast ratio, long life, cloning function enabling you to copy settings data from one projector to others of the same model, and is wireless presentation ready. Plus, embedded networking gives you the ability to manage and control multiple projectors over your LAN (scheduling of events, centralized reporting, image transfer, and email alerts). Best of all, the high performance MP-EU5002 is exceptionally reliable and offers a very low cost of ownership.

Accessories and Lenses

Supplied Accessories
- Remote control, power cord, computer cable, AA batteries x 2, hook metal, adapter cover, HDMI cable holder x 2, cable tie, Ferrite core, security label, user’s manual (concise)

Optional Accessories
- USBWL5G wireless adapter

Optional Lenses
- N/A

Replacement Parts
- Lamp: Lamp free
- Remote Control: HL03037
- Filter: UX43171

Specifications

Projection Technology
- 3 LCD, 3 chip technology

Resolution
- WUXGA 1920 x 1200

Brightness
- 5,000 ANSI lumens

Colors
- 1.07 billion colors

Aspect Ratio
- Native 16:10, 4:3, 16:9, 14:9 and zoom compatible

Contrast Ratio
- 500,000 : 1 (Dynamic Black on)

Throw Ratio
- (distance : width) 1.3 - 2.1 : 1

Focus Distance
- 26" - 533"

Display Size
- 30" - 300"

Optional Accessories
- USBWL5G wireless adapter

Optional Lenses
- N/A

Replacement Parts
- Lamp: Lamp free
- Remote Control: HL03037
- Filter: UX43171
